

MANUFACTURING SERVICES

API Engineering combines the service levels of a local support structure with the cost advantages of purchasing from low cost suppliers. Our decades of experience building long term relationships with a range of different supply partners ensure that our customers receive attractive solutions for everything from one-off projects to large production runs.

With a fully owned subsidiary office in Shijiazhuang and permanent, qualified staff located in the Chinese Provinces of Hebei and Henan, all our supplier are audited and projects are managed by our in-house inspectors and engineers. Every order is fully inspected and approved by API Engineering's inspectors prior to packaging and shipping to our customers. All employees have first-hand experience of the inspection and quality requirements of Western customers.

Full material and dimensional records can be provided for all components and witness inspections and independent verification from inspection agencies like DNV, Lloyd, GL, UL etc. can also be provided. API Engineering can also accommodate for specific testing and documentation requirements such as the PPAP documentation required in the automotive industry.

YOUR PARTNER IN HEAVY ENGINEERING

TECHNICAL SERVICES
DESIGN AND MANUFACTURING
COMPONENT SUPPLY

BACKGROUND

API Engineering is part of the API Group which provides engineering and manufacturing services to customers world-wide. The API Group comprises of five companies;

API ENGINEERING

Specialising technical assistance, design and supply of components, consulting and project management for the heavy engineering industry.

PPI ENGINEERING

Experts in the design, supply and support of rotating electrical machines.

CNE INTERNATIONAL

Specialising in the supply and support of medium and high-voltage motors and generators.

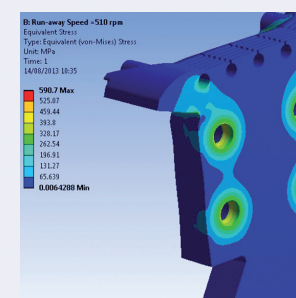

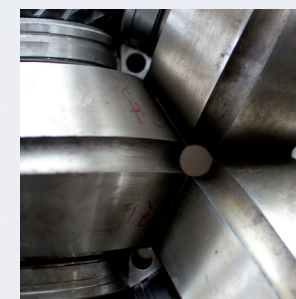

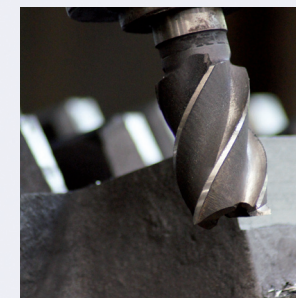

API CAPACITORS

Designs and manufactures Power Capacitors for a range of applications.

API STONE

Suppliers of granite and sandstone for engineering projects

With the combined experience of the API Group, we are able to work across a range of sectors and provide specialist advice and support for most engineering related queries.

ABOUT US

API Engineering has its offices at the group headquarters in Norwich, UK. API Engineering was established to provide support for heavy engineering businesses seeking to lower their input costs. Although initially focussed on supporting operations in the UK and North America, the company has since developed a customer base in Asia, South America and mainland Europe.

API Engineering has sales organisations in the United Kingdom, Mainland Europe, the United Arab Emirates, North America and South Africa. Contact is maintained with the component supply chain using local and expatriate engineers based in China and Eastern Europe.

TECHNICAL SERVICES

API Engineering has decades of experience in a number of different engineering disciplines allowing us to work closely with our customers and manufacturing partners to assess our customers' needs, design and re-develop components, select materials, perform testing and inspections and provide project management services from project start to completion.

Our in-house capabilities include but are not limited to:

- > Computer Aided Design (CAD)
- > Failure Analysis of components
- > Design and development of new products
- > Finite Element Analysis
- > Design and Optimisation of electrical and mechanical components
- > Software Production and Development

PRODUCTS AND MARKETS

Our goal is to reduce our customers' costs without compromising the overall quality of the components and services supplied. Through long and established relationships with our suppliers we can provide a range of mechanical and electrical components for the following industry sectors:

- > Automotive Forgings, Castings and Pressed steel
- > Steel and Tube Mill Equipment and Tooling
- > Mineral Extraction and Processing Equipment
- > Oil and Gas Equipment
- > Marine Industrial Equipment
- > Agricultural Equipment
- > Capital Equipment including pumps, compressors, motors generators, underground mining equipment, gear reducers
- > Power generation equipment - wind, water, steam and gas turbines
